

EZTest Biological Indicator

EZTest Steam / Flash

Spore	Incubation	Population	Units	Reorder #
<i>G. stearothermophilus</i>	24 Hours at 55-60°C	10 ⁶	100	EZS/6

EZTest is a self-contained biological indicator for monitoring steam / flash steam, ethylene oxide, hydrogen peroxide, or propylene oxide sterilization. EZTest contains bacterial spores on a filter-paper carrier packaged within a small, thermoplastic culture tube. Inside the thermoplastic culture tube is a sealed-glass ampoule of specially-formulated soybean casein digest culture medium containing a color indicator which turns a dramatic yellow when spores grow. EZTest is easy-to-use and produces visual results within 24 hours (steam, hydrogen peroxide, or propylene oxide) or 48 hours (ethylene oxide) without laboratory transfers.

- FDA 510(k) Cleared (steam and EO)
- 24 hour results for steam, H2O2 or PPO
- 48 hour results for EO
- Easy to Culture
- No Laboratory Required
- Dramatic Color Change
